

Serial No. 09/444,739
Amendment After Allowance
Page 2 of 4

Amendments to the Specification

Please replace lines 3-11 of page 8 of the "Summary of the Invention" with the following paragraph. This amendment will allow the Summary to reflect the allowed claims.

Page 8, lines 3-11:

~~A system, method and article of manufacture are provided~~ The present disclosure provides for generating error and summary reports for a data load. First, a plurality of records to be loaded in a database are received. The records may include medical records. A data management template corresponding to the records is chosen. Next it is verified that all records to be loaded match the data management template. All or matching records are sent to a database for loading in the database upon validation that the records match the data management template. A report of records that match the data management template and records that do not match the data management template is compiled.
